I do cheerfully consent to the quotations  
being used as requested in your letter.

-----  
I had a little trouble with the word  
administrative on p. 162, which does not convey  
an accurate impression, and would suggest the  
following alternative wording:

*local*  
...devoted to <sup>local</sup> curatorial responsibilities  
(as department head and elsewhere in the  
university, and as co-leader of several  
major research projects), a quarter to the  
research and fellows and students in his own  
laboratory, the rest to policy-oriented  
study and work.

*I am looking forward to  
your book*

*(P.S. see the profiles on  
Carl Sagan, New Yorker 6/76  
for more material on him  
[and me].)*
